Amendment Under 37 C.F.R. § 1.111 U.S. Patent Application No.: 10/765,168 Atty Dkt No.: 71508.00002 Customer No.: 57362

AMENDMENTS TO THE CLAIMS:

This listing of claims replaces all prior versions, and listings, of claims in this application:

1. (Currently Amended) A spring loaded device assembly that is coupled to a moveable device, the spring loaded device assembly comprising:

a spring loaded device, comprising: for use with hydraulic systems, said spring loaded device including:

an outer tubular member;

a spring mechanism disposed in thean outer tubular member;

an inner tubular member movably disposed in one end of said outer tubular

member;

an adjustment rod that is coupled tomovably disposed in said inner tubular

member;

a clevis attached to a distal end of said adjustment rod for <u>coupling to the</u>

<u>moveable device</u> attachment to a hydraulic system; and

a shaft that engages the moveable device to impart movement to the moveable device and that engages the clevis to impart a lateral force on the inner tubular member to compress or decompress the spring mechanism.

a rigid mounting member having two ends, a first end being attached to another end of said outer tubular member, and a second end being attached to the hydraulic system to prevent swivel of said spring loaded device.

Amendment Under 37 C.F.R. § 1.111

U.S. Patent Application No.: 10/765,168

Atty Dkt No.: 71508.00002

Customer No.: 57362

2. (Currently Amended) The spring loaded device assembly according to claim 134, wherein said mounting member includes a threaded hole through which a bolt is threaded into said another end of said outer tubular member.

- 3. (Currently Amended) The spring loaded device assembly according to claim 1, wherein said moveable device is adapted to control hydraulic system is a bi-directional piston pump.
- 4. (Currently Amended) The spring loaded device assembly according to claim 3, wherein the moveable device is a distal end of said clevis is attached to a swash plate shaft of said bi-directional piston pump.
- 5. (Currently Amended) The spring loaded device assembly according to claim 3, wherein said shaft is adapted to move the bi-directional pumpspring mechanism moves said elevis through positions corresponding to forward, reverse, and neutral gear-positions.
 - 6. (Canceled)
- 7. (Currently Amended) A spring loaded device assembly that is coupled to a moveable device, the spring loaded device assembly comprising:
- a spring loaded device, comprising: for use with hydraulic systems, said spring loaded device including:

Amendment Under 37 C.F.R. § 1.111 U.S. Patent Application No.: 10/765,168

Atty Dkt No.: 71508.00002 Customer No.: 57362

an outer tubular member;

a spring mechanism disposed in thean outer tubular member;

an inner tubular member movably disposed in one end of said outer tubular

member;

an adjustment rod that is coupled tomovably disposed in said inner tubular

member;

a clevis attached to a distal end of said adjustment rod for coupling to the

moveable device-attachment to a hydraulic system; and

a shaft that engages the moveable device to impart movement to the moveable device and

that engages the clevis to impart a lateral force on the inner tubular member to compress or

decompress the spring mechanism; and

a rigid mounting member that is adapted to couple the spring loaded device to a structure

that houses the moveable devicemeans for providing rigidity to the spring loaded device when

attached to said hydraulic system.

8. (Currently Amended) The spring loaded device assembly according to claim 7,

wherein said <u>rigid mounting memberrigidity means</u> comprises:

a mounting member having two ends, a first end that isbeing attached to another end of

said outer tubular member, and

a second end that isbeing attached to the structure that houses the moveable device, the

rigid mounting member being adapted said hydraulic system to prevent swivel of said spring

loaded device.

Amendment Under 37 C.F.R. § 1.111

U.S. Patent Application No.: 10/765,168

Atty Dkt No.: 71508.00002

Customer No.: 57362

9.-12. (Canceled)

- 13. (New) The spring loaded device assembly according to claim 1, further comprising a rigid mounting member having two ends, a first end being attached to another end of said outer tubular member, and a second end being attached to a structure that houses the moveable device, the rigid mounting member being adapted to prevent swivel of said spring loaded device.
- 14. (New) The spring loaded device assembly according to claim 13, wherein said two ends of said mounting member are vertical portions connected by a horizontal portion.
